Work Experience

Pinterest

Jul 2022 – Present

Software Engineer II (Mar 2024 – Present) - Developer Fundamentals Team

San Francisco, USA

- Built EC2-based development environments and created an internal VSCode extension marketplace to improve developer productivity
- Serve as GitHub lead; currently building AI-safe sandboxes for local development
- Technologies used include Python, Java, GitHub, AWS EC2, and VSCode

Software Engineer I (Jul 2022 – Feb 2024) - Code & Language Runtime Team

- Led migration of 2 monorepos to GitHub and enabled merge queues and managed pipelines for monorepo workflows across the organization
- Introduced the first Python service in the team's Java/Bazel monorepo, establishing patterns for polyglot development
- Technologies used include Python, Java, Bazel, and GitHub

American Express

May 2021– Aug 2021

Software Engineering Intern

New York, USA

- Created a production level, full stack web application that allows users to perform keyword extraction on text
- This project will allow American Express employees and customers to save hours of time by allowing them to easily extract keywords from very large text documents
- Technologies used included React, Flask, KeyBERT, AWS S3, Docker, and Jenkins

Space ML

Jan 2021– Sep 2021

Artificial Intelligence Researcher

Remote

- Our project was selected as a Top 5 AI proposal for NASA SMD's Search for Groundbreaking Science
- I'm working on creating a machine learning pipeline that will run a machine learning model efficiently and reliably on decades of satellite data
- This pipeline is automated, fully scalable, and very efficient, which has saved thousands of dollars
- Technologies used include Python, PyTorch, Google Cloud Platform, and Nvidia DALI

University of Florida

Jan 2021– May 2022

Teaching Assistant - Programming Fundamentals II

Gainesville, USA

- Work with other TAs and the professor to effectively run an introductory CS class of 500+ students
- Responsible for teaching discussion sections with 25+ students, grading assignments, and hosting office hours
- Required to have an in depth understanding of C++ and the ability to communicate and work well with others

Projects

Battle of the Beats

May 2021– Jul 2021

React, Node, Express, Spotify Web APIs

- Created a full stack web application that allows Spotify users to create new playlists based on a selected song
- Designed to ease the process of discovering new songs and creating new playlists by allowing the user to find similar songs and add them to a new playlist with one click

Technical Skills

Languages: Python, Java, C++, JavaScript/TypeScript

Tools & Platforms: React, Node.js, Bazel, Git/GitHub, AWS (EC2), Docker, VSCode

Education

University of Florida

Jul 2018 – May 2022

Bachelor of Science in Computer Science, Minor in Business Administration
